

## TWICE

design Mauro Lipparini

The strong personality of an important object, a styling project capable of interpreting design in a creative manner. The legs of Twice are available in mocha painted or anthracite grey painted oak, in walnut, or in matt or glossy lacquered wood, in black or white. The table top is available in black painted or black acid-treated glass, white painted or white acid-treated extra light glass, sand painted extra light glass, in dark brown or anthracite grey painted oak, in walnut, or in matt white lacquered wood. In the extending version, thanks to the side movement, the legs are positioned at the end of the table, without getting in the way of the seated guests; the 70 cm extension makes it possible to increase the length of the table top.

Available in the fixed or extendable versions.
