

BONALDO

PEANUT

design Mauro Lipparini

A strong expressive value for a piece of furniture intended to stimulate our most creative and imaginative side. A wraparound softness which affords intense moments of relaxation.

The ability to create the perfect composition: Peanut B., thanks to the host of different modules available, is an extremely versatile sofa, which blends in seamlessly with any space and style. The white feather and polyurethane foam padding make it especially comfortable; the composition can also include certain modules fitted with a sliding mechanism to extend the length of the seat, for further comfort. The fully removable upholstery covers are available in fabric or leather.
