

## MATCH

design Mauro Lipparini - 2013

An interesting balance between top and structure; the delicate legs which recalls the lightness of a match. Match is an extending table, featuring legs in solid ash-wood (whitened, painted walnut-wood or painted anthracite grey). The table top is made of extra-light glass (painted white, acid-treated white), acid-treated black glass or white or anthracite grey lacquered Doluflex®. It is distinguished by a profile in the same shade as the top itself (lacquered white or matt anthracite grey). The extension is made of Doluflex®: lacquered white or anthracite grey.

### TOP/EXTENSIONS:

white painted extra-light glass /  
lacquered white  
black acid-treated glass /  
lacquered anthracite grey  
white acid-treated extra-light glass / lacquered white  
lacquered white Doluflex®  
lacquered anthracite grey Doluflex®
