

CARUZZO

DESIGN: FRANS SCHROFER, 2015

Caruzzo

Caruzzo is a swivel armchair made just for you. He boasts a high back for your privacy and traditional upholstery details to ensure that Caruzzo is a feast for the eyes. The striking embroidered seam on the back of the seat is hand-made by Leolux craftsmen. It looks fantastic of course in a contrasting colour.

With Caruzzo, Frans Schrofer created a high-backed armchair of great class, with plenty of attention to design and ergonomics. And because functional design is in our blood, Leolux has added a clever mechanism so you define how actively or passively you want to sit yourself.

Features

- Caruzzo is available as a swivel armchair in two seat heights (+2 cm).
- Inside and outside of the seat can be covered separately in any Leolux covering.
- The foot is finished in polished aluminium, the handle in chrome. Both can be finished in lacquer.
- There is a matching footstool for extra comfort.
