

Tracks

Alain Gilles

The "tracks" are two parallel steel beams which make up the table top extension mechanism and are clearly visible, from the top and from the side, thereby becoming the fundamental feature which determines the styling of the table. For a special youthful table for a designer setting you can choose the frame in various colours: red, blue, saffron yellow, green and mint green. For an equally special yet more discreet look, which will blend in more easily with elegant and sophisticated surroundings, the frame is also available in anthracite grey, black, white, dove grey or brown. The frame is teamed with a glass table top (transparent or extra light transparent) and with wooden legs in ash-wood (natural or brushed grey) or American walnut-wood.

TOP AND EXTENSIONS:

transparent glass

extra-light transparent glass

LEGS:

natural polished ash

grey polished ash

American walnut (not polished)

STRUCTURE:

mat red painted steel

- mat black painted steel
