

## NUOVO ARTURO

design CRS Bonaldo

A compliment of a dynamic lifestyle; comfort always at your fingertips.

Arturo Classic and Nuovo Arturo can be used as armchairs, chaise longues or beds thanks to a side lever that allows you to recline and adjust the backrest to various positions. The support cushion further increases the sense of comfort. The covering is available in fabric or skay (eco-leather) and is fully removable. The armrests, feet and wheels of the Nuovo Arturo version are made with natural beechwood and are available in anthracite grey or dark brown. The armrests of the Arturo Classic version, on the other hand, are made with anthracite, self-skinning polyurethane. The feet and wheel supports are made with silver-painted metal.

### UPHOLSTERY:

fabric

skay (eco-leather)
