

FLAG

design Mauro Lipparini - 2011

Owing to the choice of materials for the table top and to the painstaking care for detail in the legs, Flag is destined to play a significant visual role in a living room marked by elegance and character.

The legs of Flag are available in polished grey or polished white ash-wood, or in canaletto walnut, and they are embellished by a steel profile painted matt in dove-grey, anthracite grey, orange or white. The table top is available in black painted or black acid-treated glass, white painted or white acid-treated extra light glass, or in basaltic stone. In addition to the fixed version, Flag is also available extendable: thanks to the side movement, the legs are positioned at the end of the table, without getting in the way of the seated guests. The 70 cm lacquered wood extension makes it possible to increase the length of the table top easily, while retaining ultimate stability and solidity.

TOP:

- black painted glass
- white painted extra-light glass
- black acid-treated glass
- white acid-treated extra-light glass
