

LAYER

design Gino Carollo

This choice gives the living room a refined elegance, owing to the pure materials and linear shapes.

The Layer extending table has a glass top: painted black or extra light painted white. The lacquered wood extension makes it possible to increase the length of the table top easily, while retaining ultimate stability and solidity. The glass legs, extra light painted black or white, move sideways to fit at the ends of the top, without getting in the way of the guests' legs.

TOP/EXTENSION:

black painted glass/lacquered matt black

white painted extra-light glass/lacquered matt white

LEGS:

black painted extra-light glass

white painted extra-light glass
