

BONALDO

CHAT

design Dondoli e Pocci

The strict geometric linearity of an object that aims to enhance the value of modernity through the choice of materials and shapes.

The frame of Chat is made of silver or black anodized aluminium, or in matt painted aluminium, in white or anthracite grey. The table top is available in black painted or black acid-treated glass, in white painted or white acid-treated extra light glass, or in an innovative lightweight and resistant material, with white laminate finish. Chat is available in both the fixed and the extending version, with one extension (Chat) or with two extensions (Chat Double). A side movement positions the legs at the end of the table, without getting in the way of the chairs. The extensions open easily, increasing the support surface.

TOP:

black painted glass
white painted extra-light glass

LEGS:

anodized silver aluminium
anodized black aluminium
painted matt white aluminium
painted matt anthracite grey aluminium
