

CENTOUNO

design CRS Bonaldo

A project which - thanks to the utmost versatility of use - aims at providing the perfect solution for the different situations we face during our everyday lives.

Centouno is a collection of single beds offering a number of different styling solutions to suit all settings. Thanks to the opening base, it can be fitted with drawers or a second bed. The fully removable upholstery covers are available in fabric, skay (eco-leather) or leather; there is a wide range of feet versions to choose from.

The Centouno collection is also available in the Centouno ego version, with removable fabric upholstery, which is embellished by special quilting.

The Centouno collection is also available in the storage version.
