

BONALDO

ICOSÌ

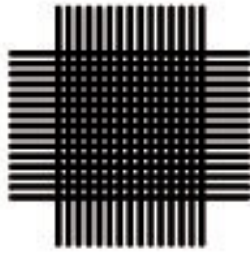

design Afroditi Krassa - 2010

A design idea based on lightness, on the principle of removing weight from the object. The Icosì coffee table has a geometrical frame consisting of curved, painted steel threads. This light-weight design makes Icosì especially versatile: it can be used stand-alone or in compositions, in the living room or in the bedroom, at home or in the contract industry. It is available with a matt painted frame in white, anthracite grey, dove grey, powder pink and coral red.

FRAME:
painted mat white
painted mat anthracite grey
painted mat dove grey
painted mat powder pink
painted mat coral red
