

## QUI-PRO-QUO

design Gino Carollo - 2010

The home as a growing space, where interior décor is to be achieved with items that can be transformed depending on the situation.

Qui-Pro-Quo is a set of coffee tables of three different heights: they can be fitted together to form a single coffee table with different levels or they can be separated to form three practical storage surfaces. They are made of matt painted metal and they are available in four different colour combinations.
