## BABEL

design Mario Mazzer - 2010

Culture as a kind of contemporary totem, a playful way of interpreting the home, of reinventing its traditional serving functions.

Babel is a five-tier bookcase with a tapered shape; it is made of matt coloured polyethylene, and it is available in white, light blue, grey and red. Irregular lines on the surface give it a natural texture. Babel blends in seamlessly with any setting, whether domestic or contract. Thanks to the material's exceptional resistance to atmospheric agents, it can also be used outdoors.
