

## EOS

design Mario Mazzer - 2011

Eos, the goddess of dawn in Greek mythology: a figure who can appear as a flower.

An original and evocative shape for Eos, a coat stand made of polyethylene in matt white, anthracite grey, orange or light blue. Thanks to the material exceptional resistance to atmospheric agents, it can easily be used outdoors. It is also available in the version fitted with a light (Eos Light), only available in white.
