

## SWING

design Jochen Hoffmann

The delicate curving invites you to take a break.

Swing, a rocking armchair featuring a contemporary design which, with a simple movement, turns into a chaise longue. The frame is made of painted or chromed steel with shrink-resistant rubber padding; the upholstery is in fabric, skay (eco-leather) or leather. In the Swing Plus version, the larger size affords further comfort. Its armrests are made of beech-wood in three possible finishes: natural, painted in anthracite grey or in mocha.

### UPHOLSTERY:

fabric  
skay (eco-leather)  
leather

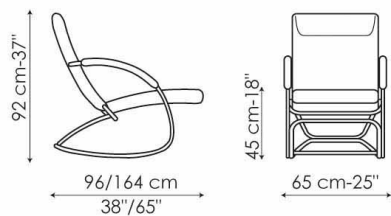

### FRAME:

painted glossy black  
painted mat silver  
painted mat anthracite grey  
chrome-plated

### ARMREST (Swing Plus):
