

## KIME

design Bartoli Design - 2013

A lightness of format, discretion and elegance. To satisfy all those who look for the practicality of the extending table top without forsaking a modern design.

Kime is an extending table with painted white or matt anthracite grey metal legs. The table top is in extra-light glass (painted white or acid-treated white), acid-treated black glass or in white or anthracite grey laminated Doluflex®. Thanks to a simple lateral sliding movement of the legs and of one or two Doluflex® extensions, the length of the table top can be increased easily, while retaining the ultimate stability.

### TOP AND EXTENSIONS:

white painted extra-light glass /  
white laminated Doluflex®  
black acid-treated glass / anthracite grey laminated Doluflex®  
white acid-treated extra-light glass / white laminated Doluflex®  
white laminated Doluflex®
