

# Enck

## F17 G03 15

Francesco Lucchese

Elegant, refined and slim, Enck is the new die-cast aluminium lamp, upshot of the creativity of designer Francesco Lucchese. Enck is based on the idea of light filtering through a slim, almost imperceptible structure. The shape is round, inspired by nature. The structure consists of two slot-in shells and is based on the idea of a sea-shell. The quick-coupling to the base has been designed for utmost ease of assembly and maintenance. Only a slight pressure is required to detach the lamp from the wall-mounted bracket. Bracket versatility also allows either wall or ceiling mounting; ideal for all lighting and furnishing requirements. Enck is available in 3 colours: matt white, polished chrome, dull gold. Electrification with LED, according to the different vattage foreseen for the ceiling or wall installation.
