~ THREE IDENTICAL LEGS ~

### Iris

Three identical legs support a glass leaf. That seems simple enough to start with, but Iris from Leolux has a lot more than that to offer. With two different leaf shapes and two heights, you make combinations that functionally enrich your living space. And given the fact that the finish of each leg can be chosen separately, the most personal choice is within reach. In oak or colour, it's all possible!

### Features

- Available in two heights and two different leaf shapes, round or triangular.
- Several lounge tables can be combined to make one bigger lounge table.
- The glass leaf is made in 8 mm thick safety glass.
- All three legs can be finished in oak (laminated, in oil or stain) or on request in lacquer.
