Technical description	: Ceiling lamp emitting light through three individual blown and hand-cut leaded crystal vases. The vases are secured to three fire retardant technopolymer and aluminum seats, which are attached to chemically tempered super clear glass platforms with a high shock resistance value. The 12 volts current is conducted from the central stem to the lamps via a silk-screened silver circuit with a ceramic varnish coating. The suspension stem and rose, which house the electronic transformers are matte nickel plated steel.
