FluoShop è un sistema espositivo completo per l'allestimento di vetrine, negozi e showroom. Innovativo nei materiali e nel design, FluoShop è in grado di valorizzare anche gli spazi più semplici e anonimi, trasformandoli in ambienti dotati di carattere e originalità.

FluoShop is a complete display system for fitting out windows, stores and showrooms. Innovative as regards both materials and design, it allows to create configurations which are full of personality and originality, capable of taking advantage of the simplest and most anonymous spaces in an instant.

Il sistema Fluoshop include innumerevoli accessori, che lo rendono estremamente versatile e adatto ad esporre, con la massima originalità e con il massimo risalto, qualsiasi tipo di prodotto.

I ripiani sono realizzati in un innovativo materiale acrilico che si "illumina" quando è attraversato dalla luce. Grazie a questa caratteristica, i ripiani appaiono luminescenti lungo i bordi, pur in assenza di una fonte di illuminazione diretta. I montanti verticali di sostegno sono invece realizzati in alluminio anodizzato.

FluoShop is extremely versatile and suitable for displaying any type of product with the highest levels of originality and in the most prominent way possible.

The FluoShop range shelves are made with an innovative acrylic material which "lights up" when light passes through it. Thanks to this feature, the shelves appear luminescent along the edges, even when there is no direct light source. The vertical support poles, on the other hand, are made of aluminium.

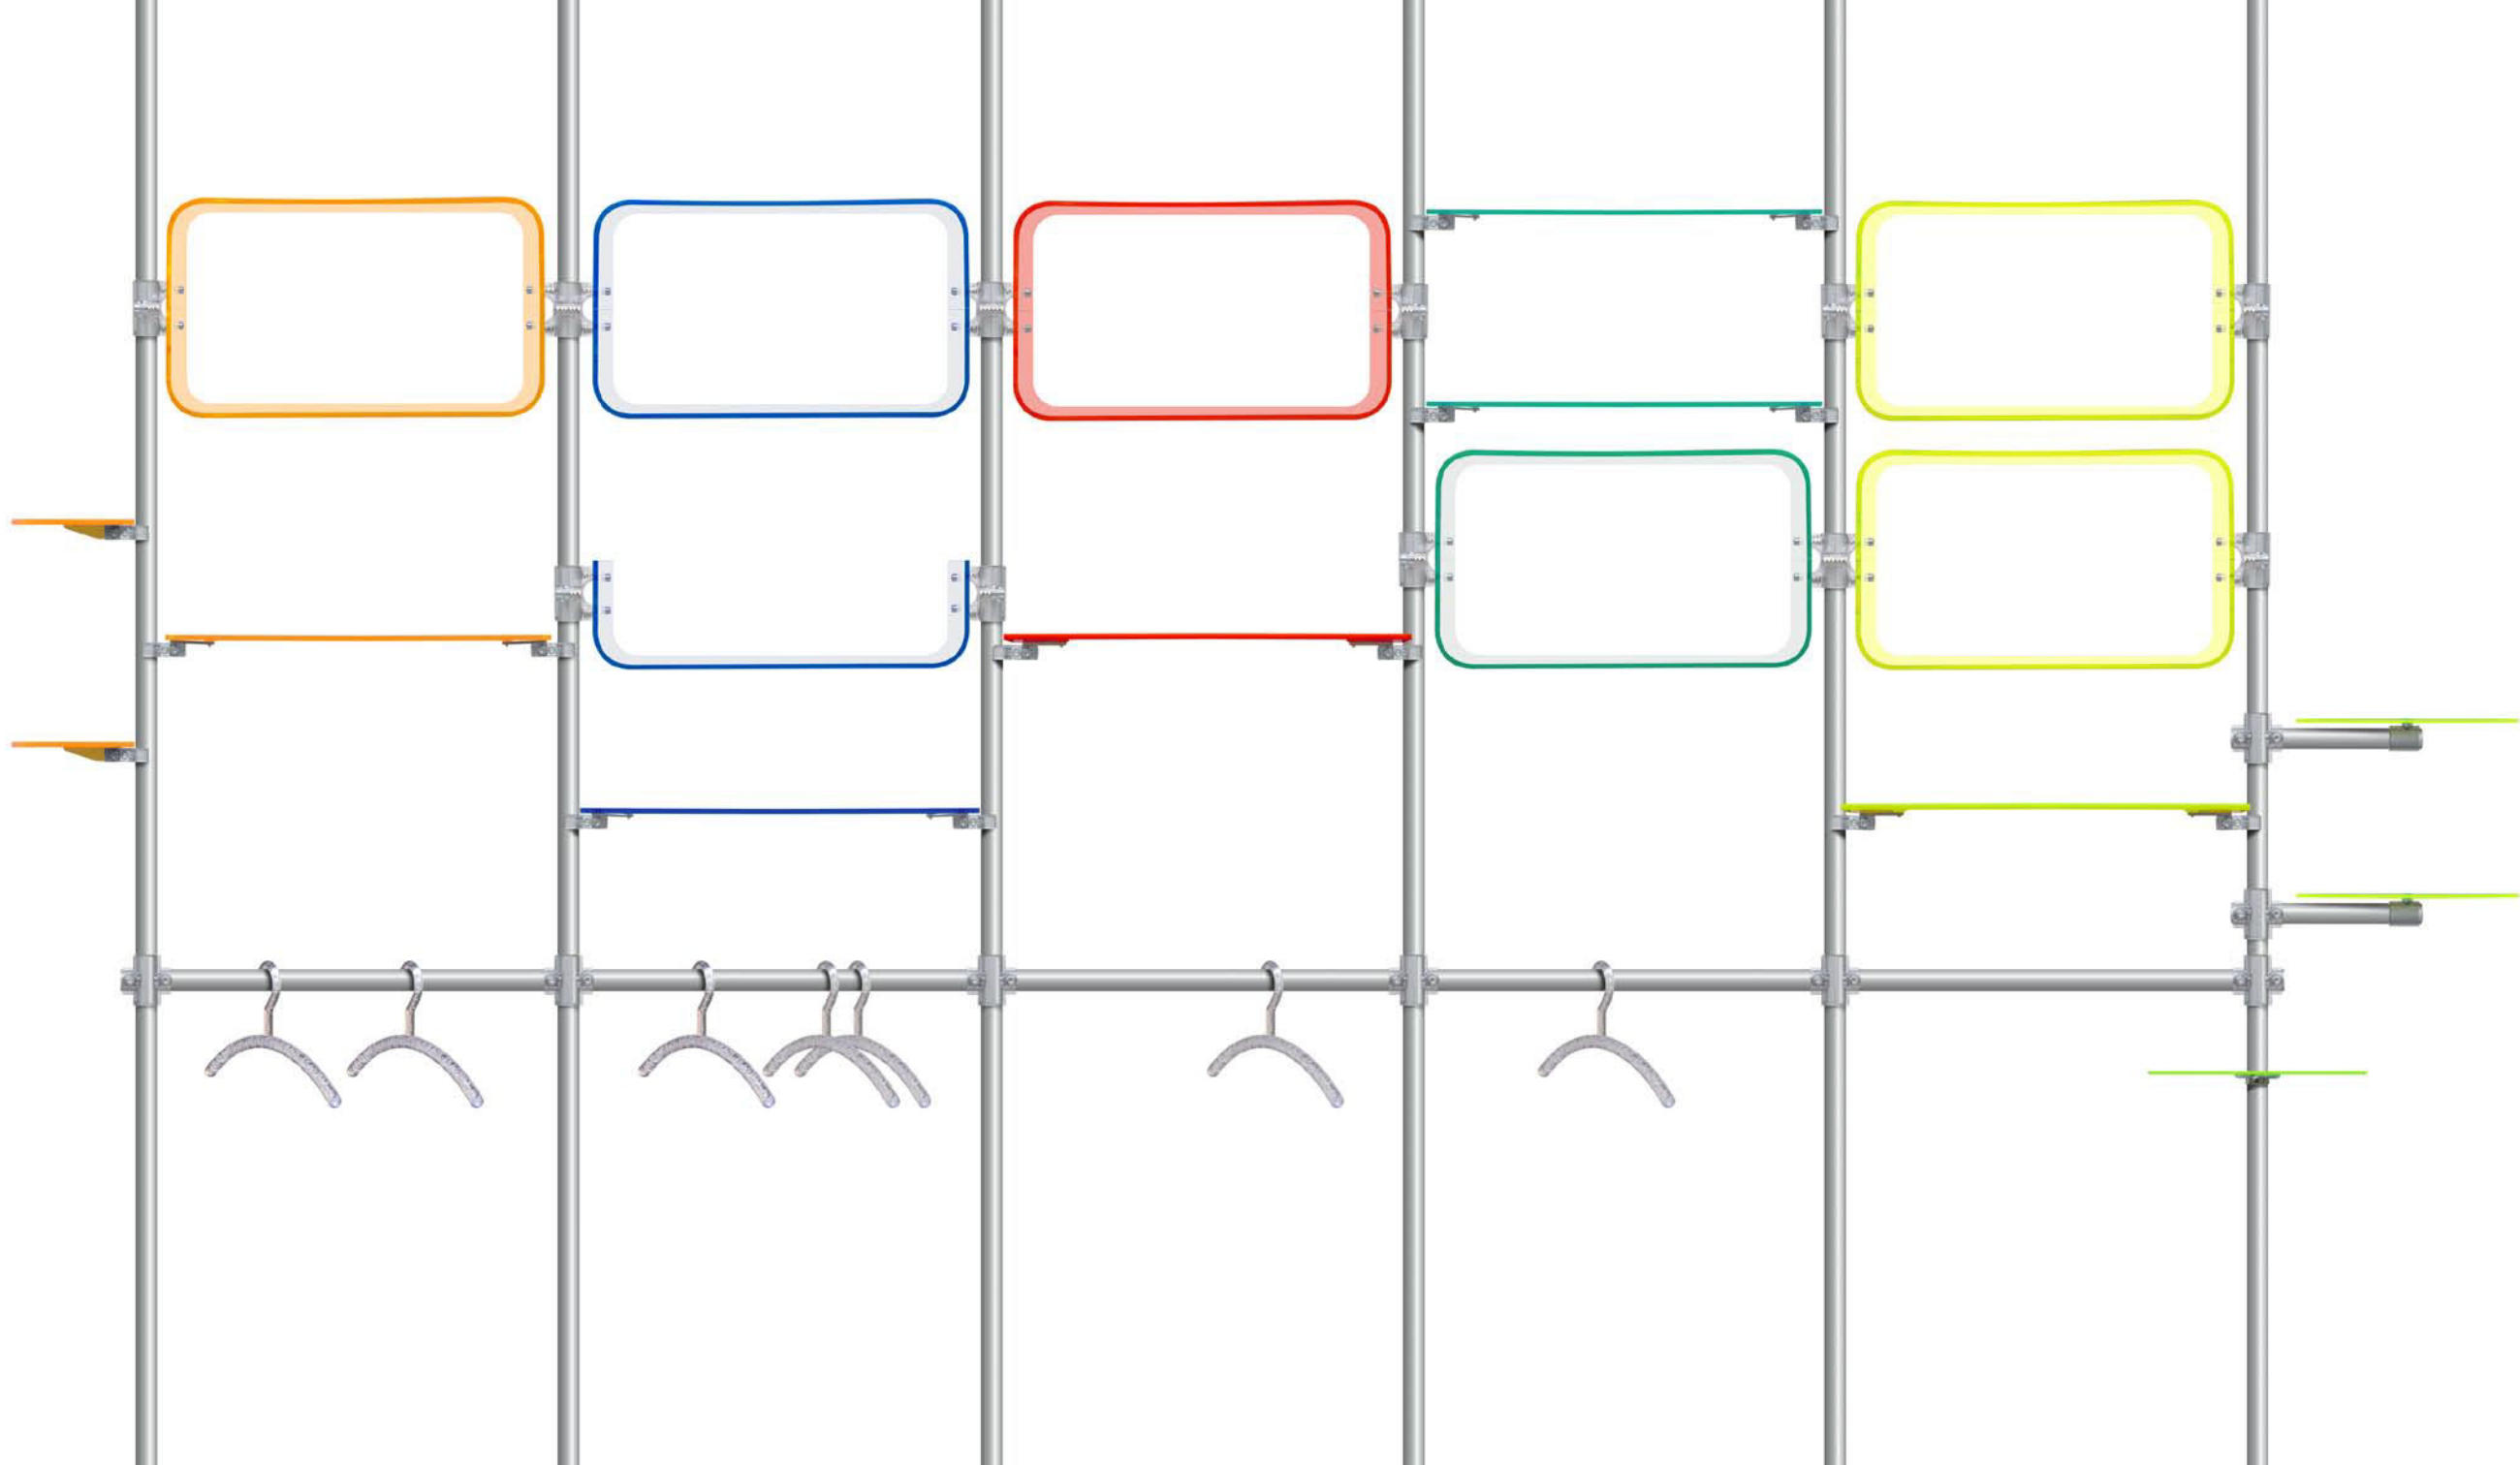

Tutte le componenti del sistema FluoShop sono di facilissima installazione. La velocità di configurazione e la semplicità di montaggio rendono FluoShop il sistema ideale per un punto vendita in continua trasformazione. In pochi attimi, ciascuna composizione può essere completamente modificata e spostata all'interno del negozio. FluoShop è adatto alla realizzazione di display, comer, vetrine e arredamenti completi.

All the components of the FluoShop system are extremely easy to install. The speed of configuration and ease of assembly make FluoShop the ideal system for a continually changing point of sale. In just a few moments. Each configuration can be changed completely and moved within the store. FluoShop is suitable for creating displays, stores within stores, window displays and complete furnishing.
