

SOFTWING

ARMCHAIR

design Carlo Colombo 2016

One of the interesting features of this armchair is the two different heights available for the backrest. The external structure in curved beech multilayer, is available with a finish in matte or gloss larch wood finish, matte ebony and natural or traditional Canaletto walnut. The internal structure is produced with Baydur® and flexible polyurethane. The covers of the backrest and seating are completely removable and can be upholstered in fabric, Ecopelle Dollaro or leather.
