

Art Console

Gino Carollo

A metal trapezium develops diagonally under the table top, allowing minimum obstruction and optimising the space. To ensure stability, the trapezium is supplemented with two legs which can be customised with inserts in the same finish as the table top. The base of Art Console is in metal; the table top is available in many materials and finishes. The console can be matched to the homonymous table.

TOP:

- solid American walnut wood
