

Construction Lamp Suspended

JOOST VAN BLEISWIJK

Inspired by the vast number of combinations possible with the tools and bolts present in his giant workshop, Joost van Bleiswijk started playing with them and ended up constructing and creating a new, exciting design! The Construction lamp ultimately originates from a bright curiosity combined with expert skills, industrial tools and a touch of playful passion for vintage construction toys. As a result, the lamp's details and joints take the shape of Victorian cast iron components & become part of a base that resembles a traditional electricity pole. Enjoy a high voltage stream of inventiveness and light!

Detailing

Just like vintage construction toys and scaffolding, the Construction Lamp is assembled by hand.

Dimmer

For fluent dimming behaviour we advise a dimmer that is compatible with the following specs.

DIMMER TYPE

Mains dimmable with compatible light source

Please note the functioning of the dimmer and the power supply combination can never be predicted, it always needs to be tested in practice.
